Our team is made up of highly experienced aviation specialists who have worked with leading aviation companies around the world. With many years of experience in the aviation safety sector,

we offer our clients an unparalleled depth of knowledge and practical expertise. We strive to provide industry leading levels of service to all areas of the aviation sector including:

Airlines and operators

Maintenance, repair and overhaul operations

General aviation

Mission critical operations

Airports, ground handlers and other service providers

Finance and leasing companies

Manufacturers of aviation products

How we can help you

We provide our clients with the services and solutions they need to help identify sources of risk within their business. Our areas of expertise and global product offerings include:

- Safety Management Systems (SMS)
- Advisory Services
- Safety Risk Management (SRM)
- Emergency Response & Management Programmes (ERP)
- Auditing and Evaluations
- Human Factor and Error Management Solution
- Incident and Accident Investigation Assistance
- Training
- Safety Planning and Governance
- Change Management

What sets SOAR apart

We have listed some of the services that SOAR provides which makes us unique.

Latin American Aviation Safety Centre (LASC)

The Latin American Aviation Safety Centre (LASC) is a safety training centre of excellence based in Colombia that will ultimately enhance safety expertise to the overall aviation community. The LASC assists the aerospace community in Latin America and to the larger worldwide audience through online and virtual programmes to:

- Enhance operational safety and quality
- Obtain and maintain IOSA, ISSA, ISAGO and other industry recognised registrations

Insurance Safety Advisory Tool ISAT

Designed by Sirius Aviation for Gallagher, the ISAT is a structured process that supports underwriter understanding of the factors specific to the operator's intrinsic risk profile and the effectiveness of its Safety Management System to manage operational safety and performance.

Lessor Technical & Operations Assurance Tool LTAT

Designed by Sirius Aviation, the LTAT model is based on reviewing operator organisational technical, flight and safety governance processes supporting oversight, continued airworthiness & maintenance implementation of a leased asset.
