

Arthur J. Gallagher & Co.

GALLAGHER GLOBAL AVIATION

Insurance Solutions for Unmanned Aerial Vehicles

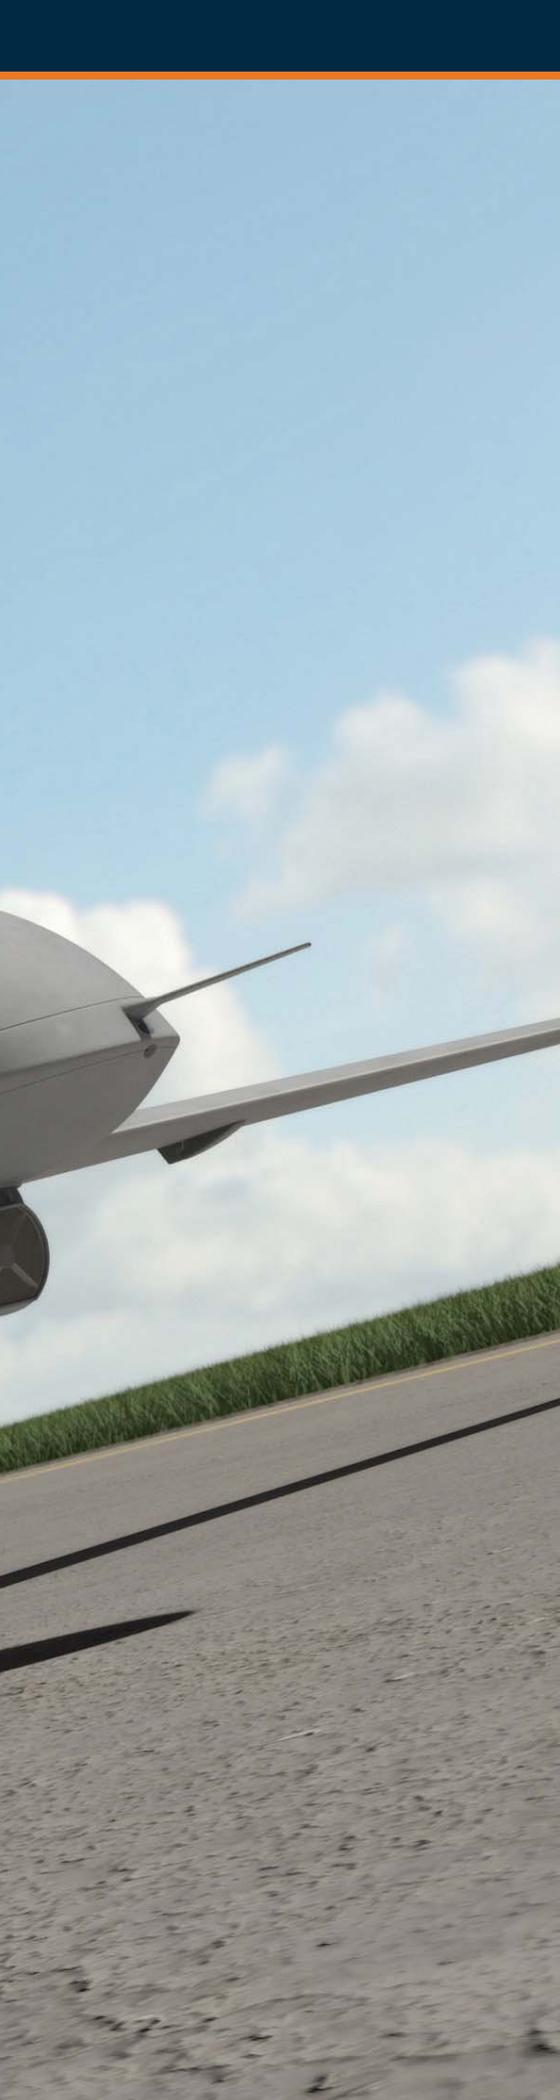

Business Without Barriers

The use of unmanned aerial vehicles (UAVs, or drones) has increased dramatically in recent years. Combined with an ever-evolving regulatory environment, drone operators must take care in assessing their risk exposure and protecting their interests.

As a leader in aviation risk management, Arthur J. Gallagher & Co. understands your unique needs and can help craft a solution tailored to your specific situation. Working with Gallagher means that you get:

- Expertise and risk solutions around the world for aviation and aerospace organizations, including risk management, non-traditional risk transfer and benefits consulting.
- Long-standing insurance market relationships that deliver preferential pricing, coverage, service and availability.
- Expertise in the unique challenges facing the Unmanned Aerial Vehicles industry.
- A team of aviation experts to help protect you from unnecessary risk as well as identify and implement strategies to accommodate the demands, conditions and continual shifts within your organization and the aviation sector overall.
- Comprehensive, service-oriented claims adjudication, processing and management.

Regulatory Issues Surrounding UAV Operations

As the FAA continues to refine their roadmap for integrating UAV's into the National Airspace System, one thing remains clear— new legislation will continue to change the landscape around unmanned aircraft. With the announcement of 6 states being named as test locations for Drones, significant legislative changes are expected in the coming years.

Until then, there are still significant restrictions on the use of drones for public and commercial purposes. Understanding the current landscape, the potential for new and changing regulations, and the need to operate safely and protect your business requires an experienced partner to help guide the way. Gallagher is currently at the forefront in developing risk management programs focused on solving the complex challenges surrounding UAV operations.

Insurance Solutions for Unmanned Aircraft

Drone operators should consider the following risks and coverages when evaluating their exposure:

- Aircraft Liability
- Aircraft Liability (War)
- Aircraft Hull
- Aircraft Hull (War)
- Manufacturer's Product Liability
- Manufacturer's Affinity Groups
- Aviation General Liability
- Airport Liability
- Non-Owned Aircraft Liability
- Invasion of Privacy Liability
- Aviation Architects and Engineers E&O
- Workers Compensation
