Claims Management	Per 100 claims in progress and/or leads generated							

Note 1: When providing the appropriate information on the context of complaints, a firm should choose the metric which best reflects whether the majority of business undertaken by the firm involves the provision of products or services by the firm itself or intermediation. In cases where this is not possible, a firm may provide information on context for both intermediation and provision.

Note 2: For provision, information on context should relate the number of complaints opened within the reporting period to the total volume of a firm's relevant business at the end date of the reporting period. This is likely to include accounts opened, loans provided, policies sold and funds and investments provided before the commencement of the relevant reporting period.

Note 3: For intermediation, information on context published by a firm should relate the number of complaints opened within the reporting period to the number of sales within the relevant reporting period only.

Note 4: It is recommended that firms publish appropriate information on context in respect of credit-related complaints. However, publication of this data is not mandatory.

Note 5: When a firm publishes the 'main cause of complaints opened', this should be the cause category prompting the largest number of complaints for the relevant product/service grouping in Table 4 of Part A-2, DISP 1 Annex 1
