

Gallagher Cyber Defence Centre

Protection beyond broking.

Strength through intelligence

“ Cybersecurity is essential for businesses now more than ever. With new threats continuing to emerge, you need to go beyond insurance to help you face the future with confidence — you need a trusted partner.

The Gallagher Cyber Defence Centre can be that partner. Our unique approach combines a team of highly trained cyber specialists along with an always-on system built to monitor your network for vulnerabilities.

We work alongside you to fortify your cyber defence, providing training for your employees and helping you minimise the chance of an attack. We invite you to read on and learn more about experiencing cyber protection beyond broking with Gallagher. ”

Johny Mongan
Global Head of Cyber Risk Management

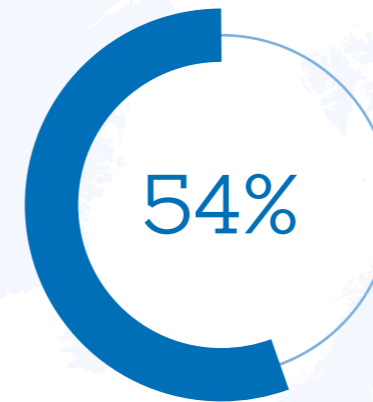

In a world where cyberthreats move fast, you need a partner who moves faster

That's why Gallagher has invested in something that no other broker has, a dedicated Cyber Defence Centre, built not just to respond, but to anticipate.

of organisations surveyed globally state that geopolitical tensions have affected their cybersecurity strategy².

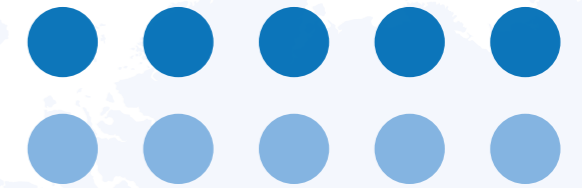

of large organisations globally identified supply chain challenges as the biggest barrier to achieving cyber resilience³.

of UK businesses undertook a cyber risk assessment in 2024⁷.

of businesses have reviewed their risks posed by their immediate suppliers⁴.

£38.28bn

The estimated cost of cybercrime in the UK in 2024¹.

We're not waiting for the next breach. We're already working to stop it

We put your security at the centre of all we do. Our Cyber Defence Centre keeps you ahead of today's — and tomorrow's — cyberthreats.

- The only broker with a Cyber Defence Centre
- Always-on monitoring of your cyber position
- Global scale in 38 countries
- Ethical hacking teams in-house
- Tactical strategies. Intelligent risk mitigation.
- Simple, powerful, clear communication

Your Cyber Defence

Gallagher Cyber Defence Centre provides ‘always on’ support that gives members access to cyber specialists and proactive security technology, including:

Vulnerability scanning

Monitoring your external boundaries and providing updates on known vulnerabilities every 14 days.

Threat intelligence webinars

Stay ahead of real-time threats and trends.

Secure humans

Cybersecurity training webinars turn your people into cyber-first responders.

Virtual cybersecurity officer

Monthly summits. Bespoke advice. Actionable insights.

Cyber risk matters newsletter

Fresh, focused updates to keep you sharp.

Community intelligence

Network with peers. Sharpen your defences. Share what works.

Advanced security services

Phishing simulations, pen testing, incident response and more.

Global reach. Personal focus

Ethical hacking teams and cyber specialists working for you.

Your Certified Cyber Specialists

Our team undertakes rigorous training and accreditations to provide a high-quality, specialised service to our clients.

We have developed our system to protect businesses across the globe:

- A dedicated team in the USA where HIPAA and SOC2 controls are required
- Support for all non-EEA countries with requirements to comply with data processing of any EU citizen
- Fully compliant with NIS2 regulations

BCS Level 4:

- Award in Network and Digital Communications
- Award in Risk Assessment
- Certificate in Cybersecurity
- Certificate in Governance, Organisation, Law, Regulation and Standards

GDPR Foundation and Practitioner

ISO 27001
Implementation Lead

BTEC Level 3
Infrastructure Technician

OSWP (Offensive Security
Wireless Professional)

Crest Registered
Penetration Tester

CEH (Certified Ethical Hacker)

OSCP (Offensive Security
Certified Professional)

MCIS (Member Chartered
Institute of Information Security)

Cyber Essentials Plus Auditor

More Ways to Keep You More Protected

In addition to our Cyber Defence Centre, we have curated a suite of products and services to help protect your organisation.

Cyber essentials implementation and accreditation

Government-backed and created by the National Cyber Security Centre. The process includes checking over 60 controls, producing a gap analysis, recommending implementations and accrediting your business.

ISO 27001 — Readiness and implementation

ISO/IEC 27001:2013 specifies the requirements for establishing, implementing, maintaining and continually improving an Information Security Management System (ISMS), specific to your organisation.

Cloud security audit

A nonintrusive review of your organisation's cloud environment to identify risk, weakness and vulnerability with remediation advice to improve security, reduce system complexity and streamline costs. Available for Amazon Web Service (AWS) auditing, Microsoft Azure auditing and O365 (Microsoft Office 365) auditing.

Penetration testing

An ethical hack of your network to identify vulnerabilities and ultimately strengthen the security of your network. External testing involves evaluating externally visible infrastructure with the aim of gaining access. Internal testing mimics attacks behind a firewall, identifying how much damage could be done in the event of a breach.

Cybersecurity awareness training

Remote sessions are delivered for your employees, identifying varying elements of cybercrime and how to stay vigilant against them and defend against common attacks.

Gallagher GDPR audits

Within this audit, we will identify those practices and processes that fall outside of compliance with the General Data Protection Regulation. We'll produce a comprehensive gap analysis that outlines which areas of noncompliance require immediate and secondary support to achieve regulatory compliance.

Virtual data protection consultant as a service

Gallagher DPC as a service will inform and advise you and your employees of your obligations to comply with the GDPR and other data protection laws and monitor compliance, working alongside your in-house DPO.

Phishing platform

Our AI-driven phishing platform tests your employees' ability to identify and report phishing emails, enabling your organisation to assess just how well your employees' efforts are helping to protect your business.

Maturity assessment

Our maturity assessment merges leading threat controls and global security standards. It benchmarks your organisation against best-in-class practices and maps a three-year improvement plan. We identify local and enterprise vulnerabilities and unify proven industry controls into one framework.

Incident response planning

We design incident response plans for a wide range of potential incidents, including malware, phishing and more, helping you act fast when it matters most. Our bespoke solutions are centred around you, shaped by your history and likely risks, guided by NIST SP 800-61 and the MITRE ATT&CK® framework.

What our clients think

“ After falling victim to a ransomware attack in May 2020, cybersecurity is now taken more seriously than ever within our business.

Gallagher's Cyber Defence Centre has become an essential tool, offering a comprehensive platform for education, protection, and compliance. For us, it's a no-brainer and now forms the cornerstone of our cybersecurity strategy.

”

Managing Director, Kelgray Products Ltd., 2025

Get started with a complimentary cyber defence check

Uncover your current exposures and understand how to mitigate them with a cyber defence check.

Request a cyber defence check, email cyberRM@ajg.com

1

Assess

Assess your organisation's cybersecurity posture against industry best practices.

2

Investigate

Investigate your organisation's publicly facing assets using open-source intelligence.

3

Respond

Respond to weaknesses with a bespoke roadmap to cybersecurity maturity.
